

## Instruction Manual Homologa Version 5

### New Features

The new version offers several improvements. Here a short summary:

- Faster extraction of data
- Easy export and alert function for data export
- New User Interface
- Extended filter options
  - Multi-region and country selection possible
  - Filter of active ingredients by Chemical group – Mode of action – CAS number – AI combination – Private Standards
  - Product filter by Trade-name – Registration number – Formulation – Product-type – Registration-status
  - Crop filter by Crop-grouping-definition – Crop – Crop-group – EPPO-code – Latin-name – Cultivation-type – Crop-purpose – Crop-production-period
- New features for MRLs
  - Multi crop group selection
  - Direct link to online original source
  - Option to filter on Future MRLs
  - Improved MRLs comparison
  - Residue definitions
  - MRLs animal products added for the EU

Cuba, Ghana, Iran, Madagascar, Thailand, Togo, Zambia will not be migrated, no more reliable and up-to date data source.

## New Interface

### Selection of Report Modules

**Homologa™**

Search Alerts Data manager User manager About Instruction manual

Brand registrations ▶  
MRLs ▶  
Food Trade Statistics

Select here the report module you wish to interrogate.  
(The Food Trade Statistics are not yet available in the new version)

### Functions

**Homologa™**

Search Alerts Data manager User manager About Instruction manual U

*Brand level*

Type in letters and names for selection will come up. Multiple selections are possible.

Region

Choose a value Choose a value

[Add active filter](#)  
[Add product filter](#)  
[Add company filter](#)

Display result Export Create alert

Add other filters from different groups.

Selection display option or create 'Alert' report.

## Filter active ingredient

### Region

Choose a value

### Active filter

#### Active

cyper|

ALPHA-CYPERMETHRIN

BETA-CYPERMETHRIN

CYPERMETHRIN

CYPERMETHRIN-H-CIS

ZETA-CYPERMETHRIN

Only one active ingredient can be selected. However if you select a letter string like 'cyper', the system will extract all active ingredients containing this string.

## Selection of columns in report

Once the report is shown on the screen, you have an option to change the selection of fields that are shown at the very bottom of the screen:

## Brand level

<b>Region</b>	<b>Country</b>	
<input type="text" value="x CEI x EUROPE"/>	<input type="text" value="Choose a value"/>	
<b>Active filter</b>		
<b>Active</b>	<b>Active group</b>	
<input type="text" value="cyper"/>	<input type="text" value="Choose a value"/>	
<b>CAS number</b>	<b>A.i. combination</b>	
<input type="text"/>	<input type="text"/>	
<a href="#">Add product filter</a>		
<a href="#">Add company filter</a>		
<input type="button" value="Display result"/>	<input type="button" value="Export"/>	<input type="button" value="Create alert"/>

Country	Product type	Trade name 1
ALISTRIA	LINSECTICIDES	Belem 0.8 MG
"	"	DRAKER 10.4
"	"	DRAKER RTU

  - Company status
  - Company group
  - Product status
  - Links
  - Product registration date
  - Product expiry date
-

## Alerts

Alerts can now be set directly in the online module under 'Search' or they can be set under the folder 'Alert'

The function is self explanatory.

In case if you have any questions, please contact us via [homologa-info@agrobases-logigram.com](mailto:homologa-info@agrobases-logigram.com) or call us +33 450 35 07 19

## Seed-Treatment

If you only wish to extract products for seed-dressing, go to the 'product-filter':

### Brand level

**Region**

[Add active filter](#)

**Product filter**

**Trade name**

## Pest-filters

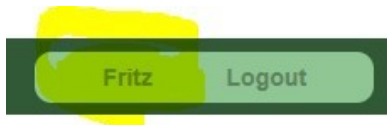

There are now several options to select pests:

- By Pest: You can type in a string of letters or select from the list.
- By Pest-Group: You can select from a list of groups (basis EPPO) with multi-selection.
- By Pest-Main-Group: You can select from a list of groups (basis EPPO) with multi-selection.
- By Eppo-code: You can type in a string of letters or select from the list. If you want to select a group of pests you can type in the necessary letters that define an EPPO-group.

## Exporting reports

The reports are exported in a text format with the extension \*.CSV. The different fields/columns are separated by a 'comma'. This works for computer which regional setting uses the 'point' as the decimal place. In case if the regional setting of the computer is set on a 'comma' for the decimal place, the setting in Homologa should be changed to a 'semicolon':
